

Fire Safety Awards

***Will the next winner be from your community?
Do you know an extraordinary person like this?***

A 16-year-old girl was at home when she was alerted to a fire by the smoke alarm. She immediately sprang into action and screamed to alert her sleeping father, who had not heard the alarm. Her father safely escaped the home, however since Amanda was in a new addition to the house, she found she could not get down the stairs through the growing fire. Following what her father had taught her about fire safety, Amanda pushed out the bedroom window and exited onto the roof. Without Amanda's quick actions, her father might have slept through the alarm and perished in the fire as well.

If this sounds like a young person from your community, make sure to nominate them for an Action Award today!

This nomination form is for the Fire Safety Action Award, which is presented to people aged 16 or under who have demonstrated fire or carbon monoxide safety knowledge by taking appropriate action to prevent or mitigate a potential fire or carbon monoxide incident. In order to make a fair and informed decision, the selection committee requires detailed information about the nomination.

NOMINATION FORM ACTION AWARD

Nominations are due by April 15, 2016
